hi, Mike,

we talked about the odorous emissions at
Gesford 7 gas well site, Carter Road,
in Dimock, Pa., Susquehanna County, Pa.,
next to , near, within 500 feet of 3 homes,

and the health affects on the people near it,
children with nosebleeds, breathing problems,
headaches, allergic symptoms--

I'm meeting with DEP oil and gas supervisor,
Kevin Costello, tomorrow
and check it out--

I've smelled it myself on a number of occasions
and its a chemical , toxic smell
that affects my throat and eyes.

the Neighbors are **Ex. 6 - Personal Privacy**
and **Ex. 6 - Personal Privacy**

thanks,

Vera Scroggins
